Mpho Itumeleng

SOFTWARE DEVELOPMENT GRADUATE

I'm a recent graduate in Software Development, and I am passionate about bringing ideas to life through code. During my studies, I got hands-on with different programming languages and project challenges, refining my skills along the way.

EXPERIENCE

SOFTWARE DEVELOPMENT INTERN ELITEX ACADEMY
Dec 2023 – Jan 2024

I worked on the creation of a web application tailored for a client, gaining invaluable hands-on experience and significantly enhancing my technical skills. Engaging in a dynamic environment, I played a pivotal role in both the backend and frontend development phases, working seamlessly across various programming languages and frameworks to ensure a comprehensive and robust application.

My responsibilities extended to database management, involving the design and optimization of data structures for optimal performance. Towards the conclusion of the internship, I had the opportunity to showcase our web application through a comprehensive demo to the client, honing my presentation and communication skills. This experience not only deepened my understanding of the software development lifecycle but also reinforced my ability to collaborate effectively within a team to deliver high-quality solutions.

OBJECTIVE

I'm all about tackling real-world problems with tech and making things work seamlessly. I'm a hard worker, committed to continuous learning, and I'm currently on the lookout for opportunities to dive into exciting projects and be a valuable asset to any team.

EDUCATION

EDUVOS

Information Technology (Software Engineering)
2021-2023

SKILLS

- Python
- HTML
- CSS
- PHP
- C++
- JavaScript
- MySQL
